ID: 4041 Support download sample account book during create new back-end account book

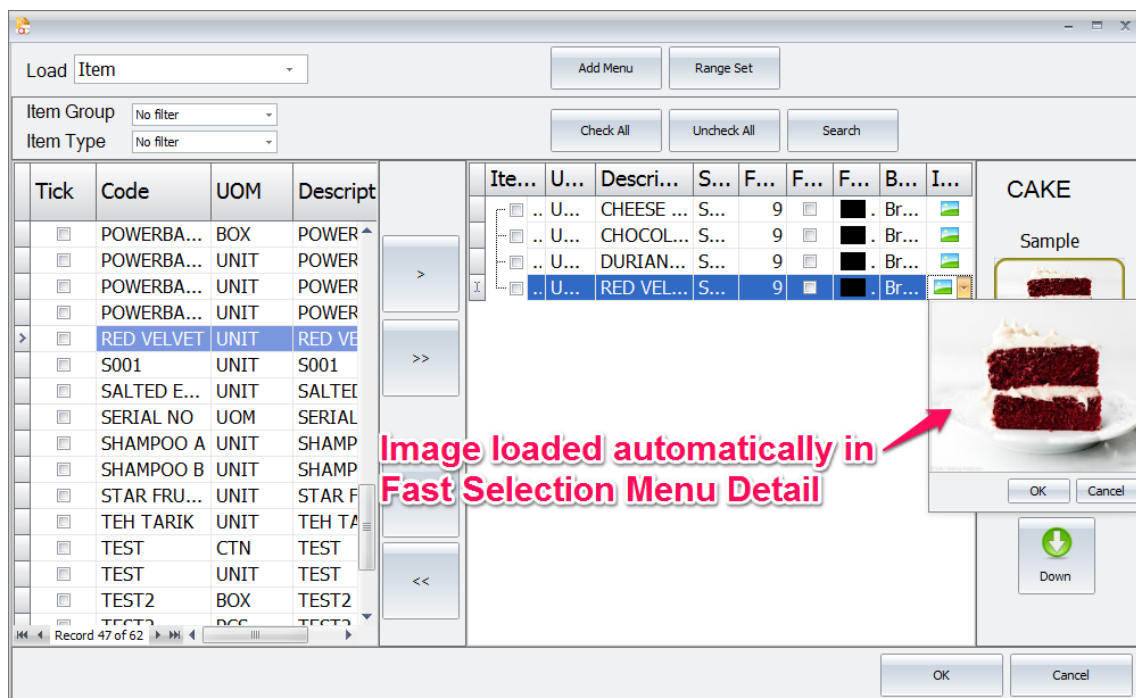

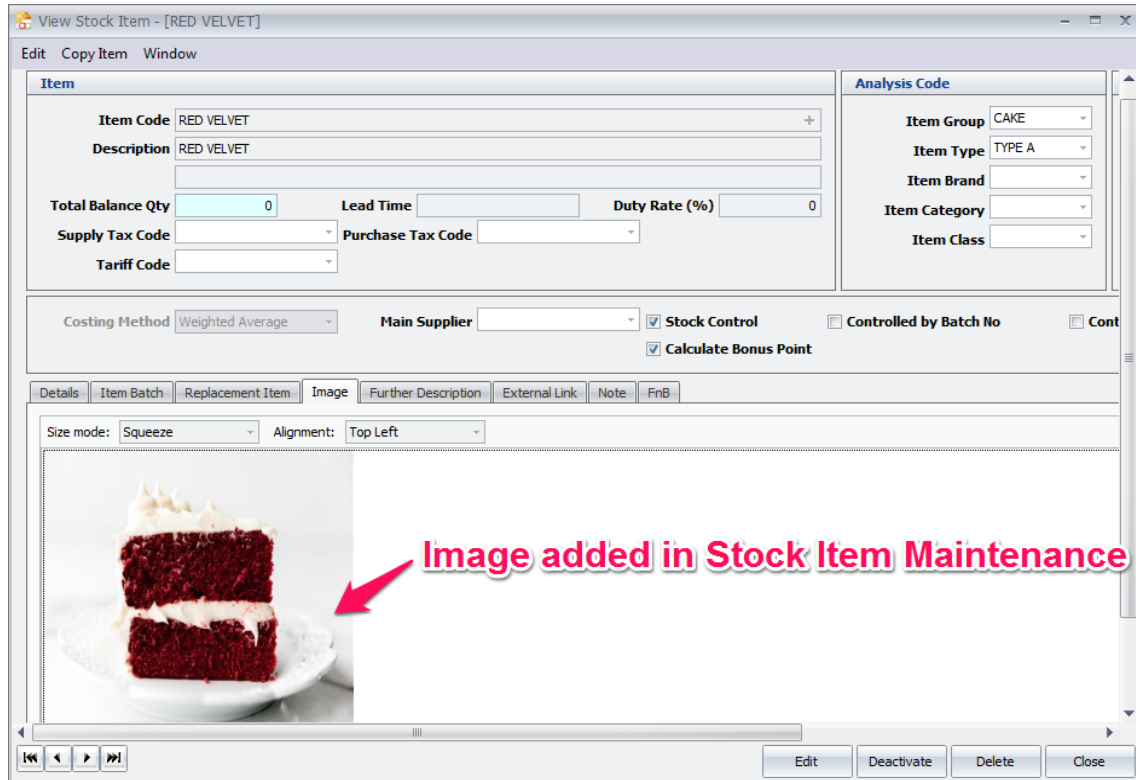

We had created 3 different types of sample FnB account book that allowed you to download and restore. Which are Bubble Tea, Chinese Restaurant and Western Café.

You can download it from back-end *File > Manage Account Book > Install Sample Account Book > Download and install form the Web.*

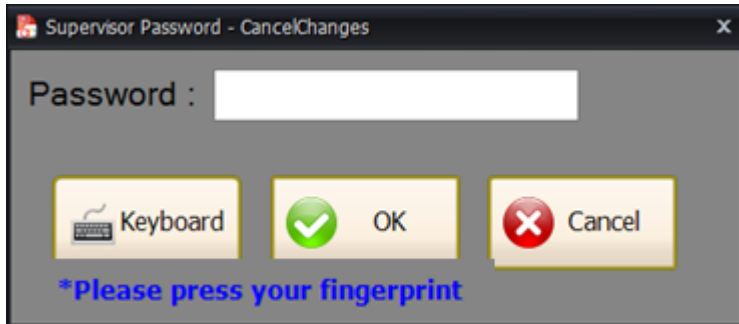

ID: 4453 Support load image from Stock Item Maintenance when add in new Fast Selection Menu Items

If you had maintained your item's image under Stock Item Maintenance, now when you add the item into Fast Selection Menu, the item's image will be loaded automatically as well.

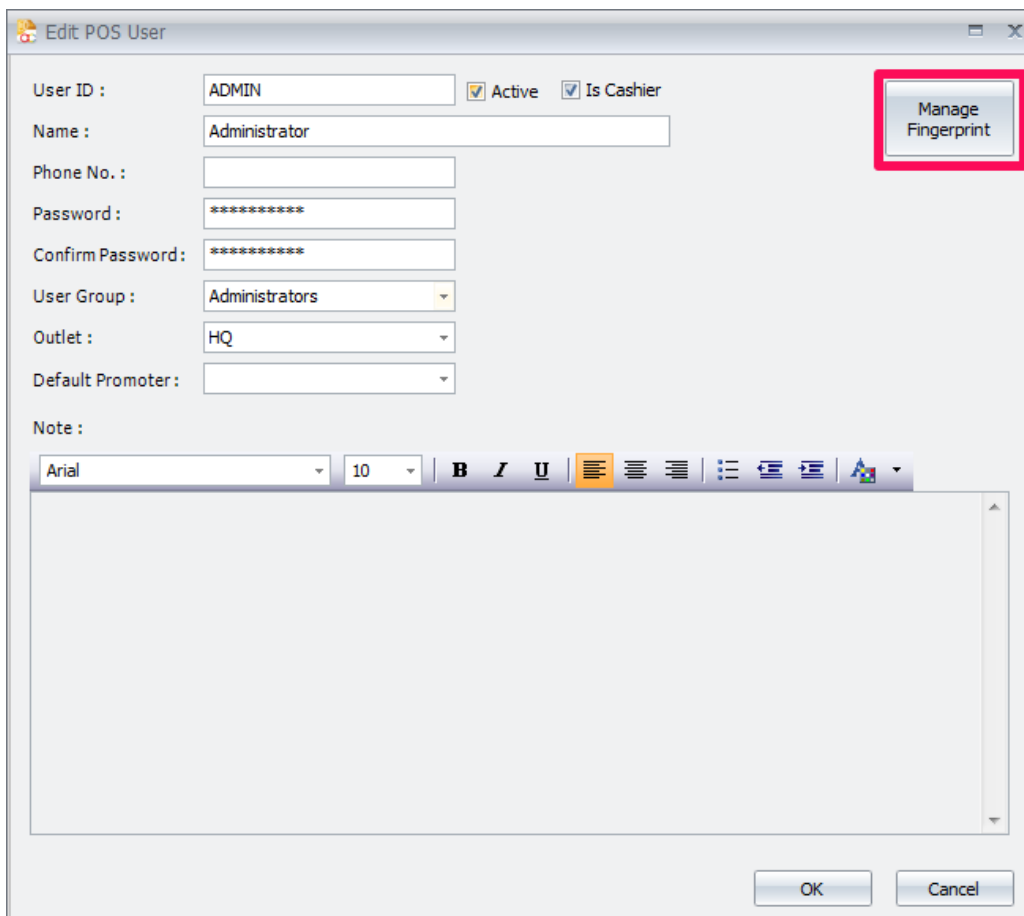

ID: 4413 Support fingerprint at supervisor bypass screen

Fingerprint is now available to be used at every supervisor bypass screen. What you have to do is just place your registered finger on the fingerprint device will do. Then system will check whether you have the access right to bypass current process or not.

Note: Fingerprint device must be installed and user's fingerprint must be maintained at back-end *Point of Sale > Maintenance > POS User Maintenance*.

ID: 4672 Support loads multiple item group and item type in Kitchen Printer Maintenance

You are now able to add in multiple Item Groups and Item Types in Kitchen Printer Maintenance, no more need to add in all of them one by one.

You can access this function at back-end *Point of Sale > Maintenance > Kitchen Printer Maintenance*.

Press the **magnifier** icon.

ID: 4645 Support Sales Credit Note in Remote HQ Function

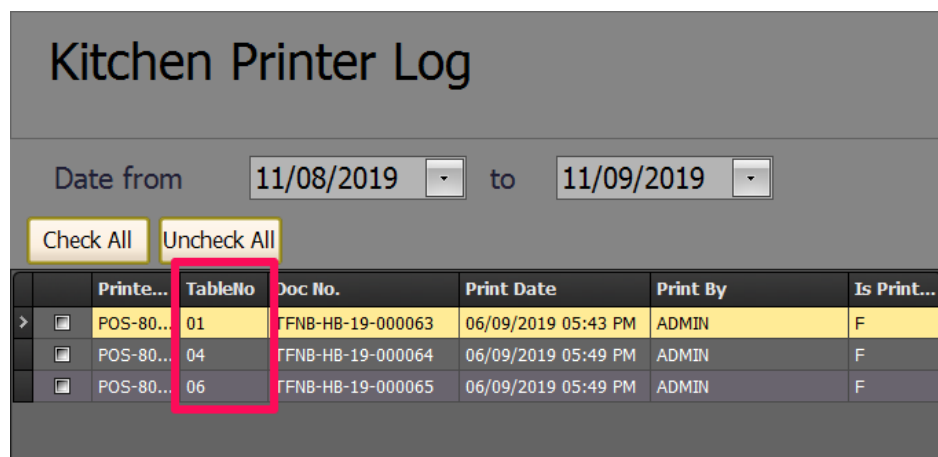

Sales credit note are now available in Remote HQ function. You can access this function at front-end *More Function > Inquiry > Remote HQ*.

Note: Remote HQ module have to be purchased in order to use this function.

ID: 4679 Add in "Table No." column in Kitchen Printer Log screen

We had added in "Table No." column in the Kitchen Printer Log screen. You can access Kitchen Printer Log feature in front-end *More Function > Inquiry > Kitchen Printer Log*.

ID: 2650 Support Auto UOM Conversion

Auto UOM Conversion is now available in this version. Auto UOM Conversion feature will help you to convert the item UOM from available quantity UOM to backordered quantity UOM.

E.g.- You have 1 item code TUPPERWARE with 2 UOM which is PCS and BOX.

Item Code	UOM	Rate	Original Balance Qty
TUPPERWARE	PCS	1	3
	BOX	12	5

From above scenario, if you create a new transaction that **selling quantity of 5 PCS TUPPERWARE in front-end**, after sync then back-end will create a Stock UOM Conversion document **and convert 1 BOX TUPPERWARE to 12 PCS TUPPERWARE**.

So, after Stock UOM Conversion created your latest balance quantity for TUPPERWARE will be **10 PCS** and **4 BOX**.

Item Code	UOM	Rate	Latest Balance Qty
TUPPERWARE	PCS	1	10
	BOX	12	4

In order to use this feature, you will need to fulfill the requirements as below:

1. Must have **Advanced Multi-UOM** module in back-end.
2. Must have **POS Advanced Multi-UOM** module in back-end.
3. Must enable **Auto UOM Conversion** option in Stock Item Maintenance.
4. Must enable **Automatic UOM Conversion** option at back-end **Tools > Options > Invoicing > Document Control**.
5. Must restart server **Sync Monitor** after you done the settings above.

Example of Stock UOM Conversion document created automatically based on front-end transaction as below.

ID: 4524 Upgrade .Net Framework from 4.5 to 4.6.1

We upgraded Microsoft .Net Framework from version 4.5 to 4.6.1. Please make sure your device / computer does support .Net Framework 4.6.1 or above.

Minimum supported operating system is Windows 7 Service Pack 1 (SP1).

Microsoft
.NET
